

Do not allow media ownership to be more concentrated than it already is. Public access to diverse media is required for a strong and functioning democracy. Do not allow companies to hold more media properties that they already do. In particular do not remove regulations that limit the number of stations one owner may hold and do not repeal the cross-ownership ban. These are essential limits on the publicly owned airwaves which you are charged with managing in the best interests of all of the people of the country.
